

**case study: Bowraville**

**project:** Bowraville (Nambucca Heads Pipeline)

**client:** Nambucca Shire Council (via Ledonne Constructions / Iplex Pipelines)

**location:** New South Wales

**product:** Flowtite GRP Piping

**manufacture & supply:** 1821m of DN500 (560mm OD) PN32 SN10000 in 6m + 3m lengths

**value:** <\$1m

**year of project:** 2012

**description:** Flowtite GRP was chosen for this project because of its high corrosion resistance and its ability to handle aggressive acid sulphate soils or soils occurring in a tidal zone. This project incorporated the use of steel fittings in combination with the high pressure GRP piping.
