

case study: Sino Iron

project: Sino Iron Intake & Outfall Pipelines

client: Citic Pacific

location: Cape Preston WA

product: Flowtite GRP Pipe & Fittings

manufacture & supply: DN1600 & DN1800, PN10 12mtr lengths x approx 8kms

value: \$10m

year of project: 2010

description: Flowtite GRP Pipe was selected due to strong technical and design support, as well as Flowtite's high quality product offering. The pipe was sea freighted from Adelaide to Dampier, whereby DN1600 pipe were nested inside of the DN1800 pipes. This halved the freight cost of normal delivery practice. Special rigid sections and fittings were designed to enhance installation and economise design. Flowtite's Rubber Ring REKA Joints made installation simple and fast.
